Python / Django / FastAPI

GraphQL / Apollo

MUI / Tailwind CSS / Chakra UI

Automatic Testing

AWS

Education

Bachelor's Degree in Computer Science

Beacon College

2009 - 2014

Overview

With over 8 years of experience in web development, I always try to produce high-quality code which is testable and scalable. In the last 3 years of my career, I mainly focused on JavaScript frameworks and I built a number of websites for both startup and large enterprise-level companies.

I always provided 100% satisfying results for my clients. Not only in front-end but also, have a strong background in back-end development including Express, Django Rest Framework, and Laravel. And strong communication skills and great teamwork skill are other fortes. When I do my task, I don't just complete it, I go the extra mile and make things better.

Work Experience

Front-End Developer *(Remote)*

Kearney   Feb 2022 - Current

- Built admin dashboard site for the machine-marketing website using **React**, **TypeScript,** and **GraphQL**.
- Participated in the development from scratch and contributed my unique ideas to the planning and architecture
- Collaborated with the back-end team & integrated **GraphQL** APIs into the front-end project.
- Integrated **Mixpanel** to analyze data on user activities.
- Used **Chart.js** for sales data visualization.
- Translated UI Figma designs into responsive & user-friendly pages using **Chakra UI**
- Manage frontend atomic UI components with **storybook**, **React**, and **Chakra UI**
- Strongly experienced in daily code reviews and feature reviews on the product roadmap.
- Conducted unit testing using **Jest** and **testing-library**

Full-Stack Developer *(Hybrid)*

Elevate Consulting Inc   Jan 2021 - Dec 2021

- Maintained & refactored responsive e-commerce SaaS platform using **React**, **TypeScript**, **MUI**, and **Laravel**
- Implemented **SSR** and **SSG** on the front-end projects to increase SEO and initial page loading speed using **Next.js**.
- Implemented admin dashboard report page using **HighChart**.
- Used third-party libraries **@reduxjs/toolkit** to manage the store.
- Built user Authentication module and social sign-in using **JWT** token and **OAuth**
- Fixed bugs on the back-end **Laravel** project.
- Improved performance of the application by modularizing components.

Full-Stack Developer

Cortex Consultants Inc   Mar 2018 - Dec 2020

- Participated in 4 projects mainly using JavaScript frameworks (**React**, **Vue.js**, **Node**)
- Integrated **Vue.js**, **Vuex,** and **Vuetify** with a **Django Rest Framework** backend APIs
- Worked in agile teams to migrate legacy code of education website to **React** + **TypeScript** + **GraphQL** + **Node.js** + **MongoDB**
- Conducted unit testing using **Jest** and **react/testing-library**
- Strongly experienced in daily code reviews for juniors and feature reviews in the product roadmap.
- Built PWA for healthcare & fitness application using **React**, **TypeScript**, and **React Native**.
- Setup storybook and built UI component libraries for global use following good code standard

Web Developer

Hone   Nov 2014 - Feb 2018

- Built static advertising websites using **HTML**, **CSS,** and **Bootstrap**
- Learned the basic principles of web programming
- Mostly worked with **PHP** and **Laravel** frameworks and built several production pages.
- Maintained and fixed bugs on legacy codebase built using **Laravel**
- Translated designs into pixel-perfect pages using **Blade Template** and **Bootstrap**
- Worked with product, design, and other development stakeholders to best understand and meet expectations efficiently.
- Improved performance of the webpage by modularizing components using **Angular**
- Implemented **Chart.js** for data visualization.
